

Now it's time with J-chip

New Receiver,

"J-chip 5" and "J-chip 8" will be released !

J-chip product News vol.19

We are pleased to announce our new receiver will come on the market!
Receiving lots of requests from user and their experience,
we developed two types of receiver, 5cn and 8ch.

Their name is **J-chip 5** and **J-chip 8**.

J-chip 5 is for 4m-width course and J-chip 8 is for 6m ~ 12m.

Both channel have following performance and can be used for
variety kinds of races for its time measurement.

- able to measure time at start point, middle and finish point
-- both channel can be used for even high density timing point.
- able to control all operation and set parameter via PC
- low cost
- easy to carry
- internal clock can be synchronized with GPS

With high accuracy, reliability and usability,

now J-chip receiver delivers excellent performance for your timing business!!

Size: L x W x H 23cm x 52cm x 36cm approx.

Weight: 15.5kg approx.
